DETAILED ACTION

1. Claims 1-6, 11-15, 40, 41, 47-51, and 57-61 are pending. Claims 1-5, 11-14, 40, 41, 47, 57-60 have been amended in this communication filed 04/04/05 entered as Response After Non-Final Action and Request for Extension of Time.
2. The claim objection to claims 1-5, 12-14, 40, and 57-60 has been overcome by Applicant's amendment to claims 1-5, 12-14, 40, and 57-60 and is hereby withdrawn.
3. The 35 USC 101 Rejection for claims 47-51 still stands as set forth here below.
4. Applicant's arguments with respect to claims 1-6, 11-15, 40, 41, 47-51, and 57-61 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 101

5. Claims 47-51 are rejected under 35 U.S.C. 101 as non-statutory. The method claims as presented do not claim a technological basis in the body of the claim. Without a claimed basis, the claim may be interpreted in an alternative as involving no more than a manipulation of an abstract idea and therefore non-statutory under 35 U.S.C. 101. In contrast, a method claim that includes in the body of the claim at least one structural/functional interrelationship which can only be computer implemented is considered to have a technological basis [See Ex parte Bowman, 61 USPQ2d 1669, 1671 (Bd. Pat. App. & Inter. 2001) –used only for content and reasoning since not precedential].

Election/Restrictions

6. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Art Unit: 3624

- I. Claims 1-6, 40, 41, 47-51, and 57-61, drawn to receiving a definition of a reverse star schema meta-model, receiving a definition of at least one customer profile group, generating a data warehouse populated with information from a source database, receiving input, receiving a definition of a data model, dynamically creating a generated database, and displaying a portion of the dynamically generated database, classified in class 707, subclass 100.
- II. Claims 11-15, drawn to receiving a definition of a customer profile group, creating a list of customers for the customer profile group, creating customer classification components, creating a first dimension table based upon the data model, and creating a fact table based upon the data model, classified in class 707, subclass 1.

Inventions Group I and Group II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because Group I has separate utility such as receiving a definition of a reverse star schema meta-model, receiving a definition of at least one customer profile group, generating a data warehouse populated with information from a source database, receiving input, receiving a definition of a data model, dynamically creating a generated database, and

Art Unit: 3624

displaying a portion of the dynamically generated database. The subcombination Group II has separate utility such as receiving a definition of a customer profile group, creating a list of customers for the customer profile group, creating customer classification components, creating a first dimension table based upon the data model, and creating a fact table based upon the data model.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
